

# Livestock Emissions Field Day

A field day showcasing tools to reduce and monitor emissions in livestock systems.

The Department of Primary Industries and Regional Development (DPIRD) and Local Land Services (LLS) are hosting a “Livestock Emissions” themed Field Day at Trangie Agricultural Research Station.

With talks and field demonstrations covering:

- low methane beef
- low methane sheep
- low methane pastures
- grazing management
- methane measurement tools
- feed additive research
- general information on-farm emissions and carbon management

**When: Thursday 24 July 2025**

**Time: 9am - 3:30pm**

**Cost: Free**

**Catering provided**

**Please remember clean shoes and clean vehicles when entering the research station.**

**Register here**
